Champagne and canapés at the Dentist!!!

Invisalign® Open Day Tuesday 27th April 2010

What are the primary benefits of Invisalign?

- Invisalign® is clear. You can straighten your teeth without anyone knowing.
- Invisalign® is removable. Unlike fixed braces, you can eat and drink what you want during treatment. You can also brush and floss normally to maintain good oral hygiene.
- Invisalign® is comfortable. There are no metal brackets or wires as with fixed braces to cause mouth irritation, and no metal or wires means you spend less time in the dentist's chair getting adjustments.

For those of you who are interested in learning more about Invisalign® please come along and join us for an informal discussion on how Invisalign® may work for you and get the beautiful smile you've always wanted. Invisalign® is the nearly invisible way to straighten teeth without braces using a series of custom-made aligners.

Invisalign® allows you to view your own virtual treatment plan before you start so you can see how your straight teeth will look when your treatment is complete.

Floss Your Way to a Healthy Heart

A new study provides direct evidence linking poor oral health and an increased risk of heart attack and stroke.

It may be that people who take care of their dental health avoid more than just a "toothache".

NEW Performance mouthwear

Another first... Bow Lane is the first practice in the UK to offer Bitetech Performance mouthwear

Call now to find out how in just one appointment you could be a different athlete whether you just run round the local park or are in the 2012 Olympic team.

Macmillan Cancer Support

We donated a tooth whitening procedure to the "In our Shoes" Annual ball and will continue to support Macmillan in the coming year.
